Introduction

This document presents an overview of the cluster policy in the UK. Given the importance to contextualise the cluster policies (and related) analysed in the factsheets, a comprehensive outlook of the country in socioeconomic terms can be consulted in the OECD Economic Survey: UK 2022. The "Economic Surveys" present the major challenges faced by the country, evaluates the short-term outlook, and makes specific policy recommendations.

The COVID-19 pandemic has caused an unprecedented economic shock to the UK and global economy. Therefore, the UK government responded with <u>emergency policies</u> such as interest rate cuts, increases of money supply into the economy as well as billion-pound fiscal stimulus packages. Yet given the nature of the COVID-19 pandemic triggering supply-side shocks and slowing down production, consumption patterns were disrupted and later subject to intense bottlenecks. In addition to the COVID-19 pandemic, the ongoing Russian military aggression against Ukraine has taken its toll on the UK economy and industrial ecosystems, negatively impacting trade tours in Europe, and increasing the likelihood / risk of a recession. This has further highlighted the significance of policy efforts in supporting SMEs and clusters.

In the following, a succinct overview of the cluster policy in the UK will be provided. The structure of this factsheet generally encompasses:

- 1) an overview of the national cluster policies,
- 2) an assessment of the state of play of the national cluster policy.

01

National cluster policy, programmes and initiatives

Strengthening the European economy through collaboration

1. National cluster policy, programmes and initiatives

In this section we provide an overview of the existing UK cluster policies on a national level. The breakdown is presented in the form of a table, with the first column showcasing information on the aspects which constitute the policy (beginning with 'Policy Objectives', following with 'Policy Focus', etc.). The second and third columns represent two national cluster policies in the UK.

Within the table the text presented in bold (black) depicts standardised categories across country factsheets (56 in total for 2022), which is applied for the comparative purposes. This is followed by a complementary descriptive text to provide more insights about the cluster policy in the UK.

	Explanation	KTN supports its beneficiaries in a myriad of ways that can help accelerate their innovation activities. Firstly, it is carried out by bringing together ideas, people, and communities to respond to challenges and drive positive change. Hereby, a place for different actors is introduced to one another as business partners, facilitating the process in discovering collaborators for grants, product delivery, etc. Specialists and advisors from broad commercial and research backgrounds with cross-cutting expertise are provided to help connect to wider networks of companies, academic, funders and sector stakeholders. Furthermore, project roadmaps are created, while dates and times of the briefing and partnering events relevant to a number of Innovate UK Grant and Research Funding opportunities are promoted. If one is, for example an entrepreneur, resources are made available to them and start-up companies, with the government collating resources from writing business plans to providing tax advice. the British Business Bank can also be involved, for example in drawing out resources that are in line with the necessary wishes to help companies receive the support needed to finance their scale-up.	£1,3B of research and demonstration facilities

	Starting year	2015	2013
	Explanation	The Network was established in 2015 by combining 15 pre-existing separate industry sector specific knowledge transfer networks, including Biosciences Electronic Sensors and Photonics and Materials Knowledge Transfer Network.	Technically speaking, the fund was initially set to run until 2021, but this does not mean that the Catapult Network programme would be discontinued. For example, the UK government published a Policy paper in July 2021, which set the goal of strengthening and expanding on the Catapult Network. Amid the Autumn Statement in 2022, the government dedicated itself to funding the UK's Catapult technology and innovation centres for the next five years with a budget of \pm 1.6 billion pounds

03 State of play of cluster policy

Strengthening the European economy through collaboration

2. State of play of cluster policy

This section presents an overview on the state of play of UK cluster policy in the form of a quantitative and qualitative assessment. The data below illustrates how the country ranks in terms of **maturity of cluster policy at the national level.** The maturity assessment is based on a combination of factors presented in Chapter 1, which receive a score based on the existence or absence of a given element in the cluster policy.

Note: the maturity assessment does not reflect the performance of a country, but only the degree of development of their national cluster policy at the moment of data collection (Q3 2022). The assessment illustrates how the country scores for each of the four criteria (policy scope, continuity of cluster policies, evidence of performance, cluster support instruments) compared to the maximum score that they can reach. Please refer to the Figure 1 for the detailed overview of the categories and the scoring system.

The table below presents an overview of the **maturity assessment for the UK** for 2022. The total score of the UK is 7 points out of 8.

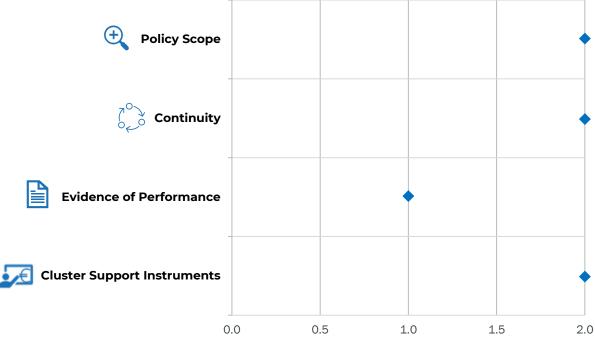

UK	MATURITY ASSESSMENT	Max score	Actual score
	Absence of cluster policy	0	
POLICY SCOPE	Broad policy	0,5	
FOLICI SCOPE	Sectoral policy	1	
	National and/or regional cluster policy	2	2
	No cluster-specific policy available	0	
	Cluster policy established recently	0,5	
CONTINUITY	Cluster policy established between over 2 and 10 years	1	
	Cluster policy established over 10 years ago	2	2
	No evaluation and / or monitoring available	0	
EVIDENCE OF	Existence of evaluations of past policies	0,5	
PERFORMANCE	Existence of monitoring or an ongoing / interim evaluation	1	1
	Existence of monitoring and ex-ante or ongoing / interim evaluation	2	
	No instruments for cluster development	0	
CLUSTER SUPPORT	Financial support for cluster development in the broader and / or sectoral policy	0,5	
INSTRUMENTS	Financial or technical support for cluster development in dedicated cluster policy	1	
	Financial and technical support for cluster development in dedicated cluster policy	2	2
	TOTAL (8)		7

Drawing from the table above that showcases the scored points in the UK's cluster policy, Figure 1 portrays the **degree of maturity** across four categories related to the national level cluster policy.

Figure 1: Maturity of cluster policy – United Kingdom

Source: ECCP (2022)

The text below provides a **qualitative description** of the state of play of the cluster policy in the UK, which is complementary to the maturity assessment presented above.

Policy scope

With the Knowledge Transfer Networks and the Catapult Networks, the British innovation agency "Innovate UK" is implementing two of the national cluster strategies. While the current national strategy defined under the Knowledge Transfer Networks, brings ideas and communities together in a bid to respond to challenges that appear on regional, national as well as international levels, the Catapult Networks

Continuity

As a national cluster of the United Kingdom, Innovate UK provides the necessary technical as well as financial support to the organisations in developing new services and products. Initially defined as an advisory body and named "The Technology Strategy Board" in its establishment year of 2004, it was firmly integrated under the national Department of Trade and Industry (DTI). Said Technology Strategy Board played a significant role in reconfiguring major funding mechanisms, like the Collaborative Research and Development Technology programme, ultimately transforming the Faraday Partnerships into the KTN (Knowledge Transfer Networks) in 2004. Hereby a further Advisory body was set up, consisting of actors from business, venture capital and regional government.

In the year of 2014, said entity was renamed to Innovate UK.

Evidence of Performance

in the year of 2021, an evaluation report was published in which the following milestones were underlined. A standout aspect was the development of a programme activity that will help the UK transition to NET ZERO and drive value for UK businesses and society during said transitional period.

On behalf of Innovate UK on the "Future flight Challenge"; since 2020 February, KTN has:

- built a network of over 2000 individuals
- Delivered 18 online events with over 15,300 attendees
- Facilitated 461 business introductions and 25 collaborations

On a specific note, multiple Innovation Networks are working on Net Zero solutions in various was such as:

- De-carbonising Ports & Harbour
- Hydrogen
- Cross-Sector Battery Systems

Cluster Support Instruments

KTN supports its beneficiaries in a myriad of ways that can help accelerate their innovation activities. Firstly, it is carried out by bringing together ideas, people, and communities to respond to challenges and drive positive change. Hereby, a place for different actors is introduced to one another as business partners, facilitating the process in discovering collaborators for grants, product delivery, etc.

Specialists and advisors from broad commercial and research backgrounds with cross-cutting expertise are provided to help connect to wider networks of companies, academic, funders and sector stakeholders. Furthermore, project roadmaps are created, while dates and times of the briefing and partnering events relevant to a number of Innovate UK Grant and Research Funding opportunities are promoted.

If one is, for example an entrepreneur, resources are made available to them and start-up companies, with the government collating resources from writing business plans to providing tax advice. the British Business Bank can also be involved, for example in drawing out resources that are in line with the necessary wishes to help companies receive the support needed to finance their scale-up.
