

ClusterNanoRoad Workshop

February 4th 2019, 16h-18h, Brussels

The ClusterNanoRoad project is aimed at developing & implementing effective smart specialization strategies in the field of NMBP (Nanotechnologies, Advanced Materials, Biotechnology, and Advanced Manufacturing and Processing) aligned with cluster development.

During a 2,5 year timeframe, ClusterNanoRoad investigated existing development strategies of regions, establishing coordination mechanisms and synergies between smart specialisation and cluster strategies & policies, interlinking the regional eco-systems into new innovation driven cross-EU value chains.

Aim of the workshop

The aim of the workshop will be to present good practices, the results of the pilot activities and the roadmap developed specifically to support regions and clusters in the design, implementation and assessment of mechanisms to support the uptake of KETs through cluster-based actions. The roadmap will be developed in collaboration with regions and clusters across Europe, with workshops hosted in multiple countries as part of a validation process.

Workshop AGENDA

Moderator: Anaïs Le Corvec, Council of European Bioregions (CEBR)

16:00 Introduction to ClusterNanoRoad project

Paula Galvão, International Iberian Nanotechnology Laboratory (INL)

16:20 Value Chain opportunities: Mapping of Good Practices

Marc Pattinson, inno

16:40 Pilot actions findings / conclusions

Mark De Colvenaer, DSPvalley.com

17:00 The ClusterNanoRoad Future Actions Roadmap: How to Support NMBP in Regions

Claire Skentelbery/Sean Kelly, Nanotechnology Industries Association (NIA)

17:30 Q&As and Open discussions

18:00 End of the Event

Venue and Registration

Résidence Palace - International Press Centre - Brussels (IPC)

155 Rue de la Loi B-1040 Brussels

T + 32(0)2 235 21 11
