

The Cluster was **initiated in 2013** and is coordinated by NANONET Foundation – it promotes modern entrepreneurship and popularises the implementation of scientific and research results. Since its creation, Silesian Nano Cluster has been **the most recognisable organisation dealing with nanotechnology and advanced materials in Poland.**

In January 2023, Silesian Nano Cluster joined the prestigious group of **Key National Clusters (KKK)** certified by The Ministry of Economic Development and Technology.

We cooperate with foreign clusters, international organizations and national agencies managing regional development.

**Innovations | Science and Business | Think-tank | Networking**
