- Collaborative Projects
- Access To Funding
- Networking
- Internationalization

Pitching Session

Cluster SCC is working on the project AMBITIOUS, a European project funded by the I3 programme, that aims to improve the companies expertise in data analysis, AI, 5G and IoT and to promote interregional collaboration and commercialization.

Cluster is focusing on the AGORA Pillar.

AGORA aims to develop a platform facilitating the standardized and secure sharing of data among telemedicine applications developed by various SMEs. This approach enables the development of new services by making data available.

Italian team is developing:

- Telemedicine Platform for Continuous Remote Monitoring and Patient Support
- An app for the Pediatric Cardiac Arrest Support Management

Pitching Session

Riccardo Lo Bue

We are seeking clinics, hospitals, nursing homes, and other types of health and care facilities interested in testing the platform and app and sharing usage data with our partners.
