

For a better cluster for everyone

SAFE SMART FOOD

The **Packaging Cluster** coordinates the **Safe Smart Food** project, to promote the food and packaging ecosystem on an international scale. The objective of the initiative is to enhance collaboration between the consortium of five European clusters and improve the management and competitiveness of organizations and their companies, especially that of **SMEs**. The nature of this call is, therefore, multisectoral and multi-stakeholder.

The consortium will work on seven aspects that converge in the two sectors:

- **1** Food Technology
- **2** Smart Products
- **3** Food Safety
- **4** Sustainability
- **5** Smart Packaging
- **6** End User
- **7** Last Mille

Over **50 exchanges** are planned between the companies involved, during the two years that the Safe Smart Food project will last, organizing 3-day missions to these countries, where our members can participate (**ask about available travel options**). Tools for innovation, internationalization, networking, sustainability and C2C workshops will be used to achieve the objectives.

*The **Packaging Cluster** coordinates the*

*consortium made up of clusters from Spain, Lithuania, Latvia and Austria: the **Foodservice Cluster from Catalonia, Lietuvos Maisto Eksportuotoju Asociacija (LITMEA) from Lithuania, Latvijas Partikas Uznemumu Federacija from Latvia and the Business Upper Austria - OO WIRTSCHAFTSAGENTUR GMBH from Austria***

Would you like to participate in the Safe Smart Food project so that the services offered by the cluster are more tailored to your needs?

You just have to answer the following satisfaction survey so that we can enhance our management skills and build a new strategy based on the demands we receive from the members.

Your opinion is important to us.
