## EXECUTIVE SUMMARY

New European Electronics for the Global Health and Wellbeing, NE4HEALTH, consolidates a real and practical Partnership among the partners, especially in order to approach internationalization activities to their SME members.

The main aim of the project is to build-up a partnership of world leading clusters to configure a “European Strategic Cluster Partnership - Going International” focused on electronics (printed, embedded...) technologies applied to health and wellbeing sectors, and make EU SMEs on these fields better connected internationally.

One of the main steps to follow to achieve this is to build a strong partnership. To accomplish this goal, contacts and networks are primordial.

This report constitutes a summary of networking activities done by each of the members of NE4HEALTH consortium. It compiles both, the activities carried out to date and those we plan for the coming months. Activities such as: participation in events, from the ECCP or others, internal events or activities from partners, synergies with other projects and with other clusters.

The purpose is to increase the interest in the project and to find as many stakeholders as possible to enlarge the project infrastructure.

# New European Electronics For Global Health and Wellbeing

6 | Page

## INTRODUCTION

This Networking report aims to compile all the proposals and actions made from the partners with the objective to increase the interest in the project.

Networking is the concept of sharing resources and services. It is a word that is already used on a daily basis in the professional field and that refers to events, both formal and informal, in which you can build a network of contacts that help you generate both, business and work opportunities.

This network of professional contacts with people who have similar interests, allows us to create synergies and business opportunities in the short, medium or long term.

Networking generates new lines of communication and business. It helps to connect ideas with actions, so that they can materialize and jointly promote a certain service or product.

In NE4HEALTH, networking gives visibility to the project in a specific environment helping to discover new possible alliances.

Professional networking is an efficient and dynamic way of keeping the project alive and nourishing itself with the news provided by similar initiatives and experts who will surely contribute to being updated in the materia.

Due to all the reasons mentioned above, NE4HEALTH consortium needs to identify and involve external stakeholders to support its internationalization strategy, by collecting letters of Intent by selected clusters, SMEs and other relevant stakeholders (e.g. technology centres) confirming their readiness to engage with the project, the consortium and in internationalization activities.

This document must compile a list of all events equivalents to the following examples, after the NE4HEALTH grant agreement:

- EUROPEAN CLUSTER MATCHMAKING EVENT (Brussels - Belgium, 22nd February 2018)
- EU CLUSTER WEEKS (Hanover - Germany, 1st to 2nd April 2019)

Last year EUROPEAN CLUSTER MATCHMAKING EVENT, was celebrated online due to the pandemic. A representation of our consortium participated in the event and in the B2B meetings held during the event.

# New European Electronics For Global Health and Wellbeing

7 | Page

## OBJECTIVE

The main goal is to promote the project and to augment the interest in it. That will help to find as many stakeholders as possible to increase the project infrastructure.

The idea of this report is to detail all kinds of events in which we have participated so far and those in which we plan to participate in the near future, and which would be better reflected in the next networking report.

The main objective of organizing this kind of activities is, a), to publicize the general idea of the project, and b) to arouse interest and get companies interested in participating and collaborating. In summary, getting people to join the project.

An important network of contacts will open the door to new opportunities and should facilitate the organization of the missions that we plan to carry out in this project.

## NE4HEALTH NETWORKING INSTRUMENTS

One of the key points in this type of events (networking events) is the 'continuity' in the time. Not because the *face-to-face* event ends, means that our networking activity must be finalised; there is always an email to send, a project to publicize or a call to do.

In networking events, a basic rule of "reciprocity" prevails, which is, it is important to create solid relationships where **both parties benefit**.

In this report we will find a compilation of the events organized or attended by the different members of the consortium.

As we believe that networking is an **essential activity** for our purposes in the project, most of these activities had to be carried out **online**. Cause establishing links with other entities with functions similar to ours, can benefit us a lot in order to experience a continuous improvement in our activity within the project.

The best approaches to generate networking *moments* are:

- Conferences
- Journeys
- Workshops
- Webinars
- Presentations (brands, products, projects...)
- Matchmaking events
- B2B meetings
- Professional social networks such as LinkedIn or Twitter

In this type of activities, a space of time is always established to facilitate the attendees to interact with each other, chat, get to know each other and expose their common interests. These moments are minutes of relaxation in which we chat naturally with other people and exchange information.

Taking this into account, between September 1, 2020, until today, NE4HEALTH consortium members (FUNCTIONAL PRINT CLUSTER, OES, ROHEALTH, LETERA and INTERIZON) carried out various networking activities, during which the project, was introduced and presented.

# New European Electronics For Global Health and Wellbeing

9 | Page

The whole consortium also aims to continue these networking and dissemination activities in the future.

Therefore, we will present in the following the activities that have already taken place, as well as the activities that we plan to organize in order to promote the NE4HEALTH project and also to build an European strategic network focused on electronic technologies (printed or embedded) applied to the health and well-being sectors.

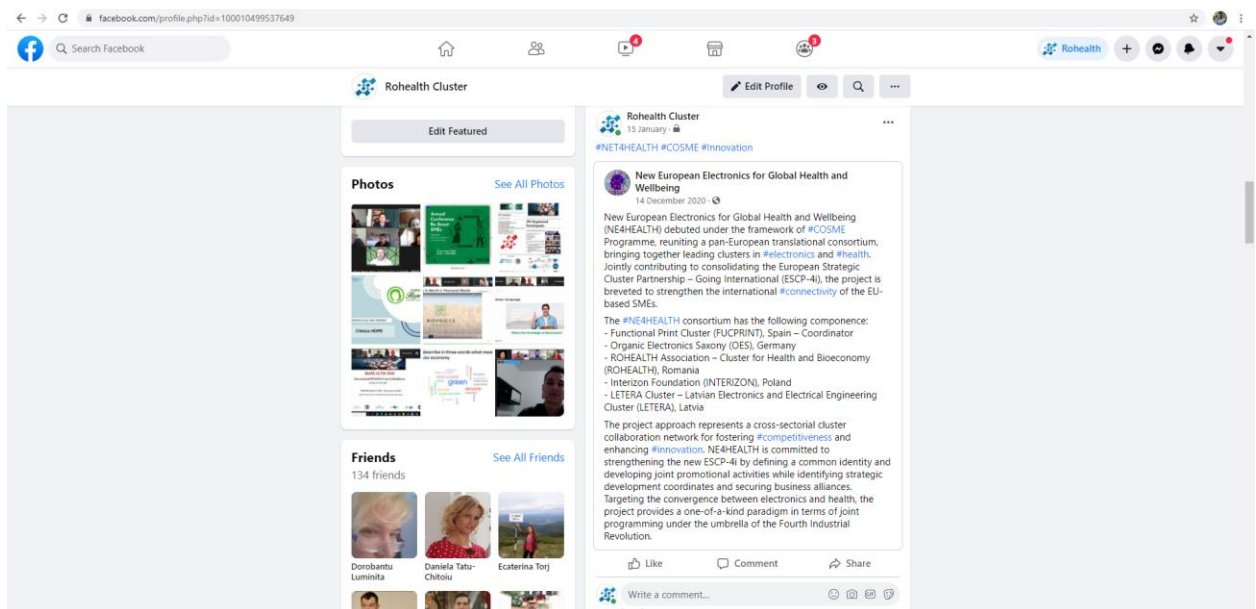

## I. Organized networking activities

### a) Marketing:

#### 1. News and social media:

Members disseminated on its social medial channels (Facebook, LinkedIn and Twitter), news about the project launching and its activities.

- ◆ The reach of the news on Facebook (from N4HEALTH Account) was 24 interactions in total regarding the news about the webinar entitled “Israeli Innovation Ecosystem - Biotech and E-health” and 30 reaches about the project N4HEALTH project launching.

**PROYECTOS**

**PROYECTO EUROPEO NE4HEALTH**  
(Convocatoria Cosme Go International)

El pasado mes de septiembre dimos comienzo a un proyecto europeo "New European Electronics for global Health and Wellness"

**¿Estáis interesados en participar y colaborar ?**

Se trata de un proyecto a 18 meses en colaboración con otros 4 clústeres de los sectores de salud y de electrónica procedentes de Alemania, Rumania, Polonia y Letonia. El objetivo principal es crear una red estratégica europea focalizada en tecnologías electrónicas (impresas o embebidas) aplicadas a los sectores de la salud y el bienestar con el objetivo de conectar mejor internacionalmente a todas las Pymes europeas relacionadas con estos sectores y conseguir llegar más fácilmente a otros países objetivo fuera de la unión europea.

Si perteneces, te interesa o trabajas en empresas del sector de la salud – bienestar o de su cadena de valor y te interesa esta oportunidad, ¡háznoslo saber!

**3NEO**

## 3. Landing webpage:

Each one of the clusters webpages are interconnected connected among them with information about the project and the NE4HEALTH network.

For the project, our official webpage is the one provided by the European Cluster Collaboration Platform:

<https://clustercollaboration.eu/eu-cluster-partnerships/escp4i/new-european-electronics-global-health-and-wellbeing>

And our individual pages related to the project are:

# New European Electronics For Global Health and Wellbeing

12 | Page

P1: <http://functionalprint.com/proyecto-europeo-ne4health/>

P2: <https://oes-net.de/projekt/ne4health/language/en/>

P3: <https://rohealth.ro/proiecte-europene/net4health-new-european-electronics-for-global-health-and-wellbeing>

P4: <https://www.letera.lv/projekts/new-european-electronics-for-global-health-and-wellbeing-ne4health/>

#### 4. Emails to cluster members:

Each cluster disseminated information about the implementation of the project by sending e-mails to all cluster members.

#### 5. Innovation Barometer

Interizon Cluster prepares the document entitled "Innovation Barometer" once every six months. There was (in October 2020) information about the implementation of the NE4HEALTH project.

#### b) B2B Meetings:

- **Intercluster meetings.** Functional Print is a member of the board directors of the federation of Spanish clusters (<http://fenaec.org/>). In these first 6 months already had meetings with Cluster MAV, Modacc, CENFIM, Packaging Cluster, GAIA... presenting the project and looking for synergies, pending the signature of a letter of intent. Also, we had an agreement signed with FENIM (<https://www.fenin.es/?locale=en>) the Spanish Federation of Healthcare Technology Companies, with the objective to organized joint workshops.
- **MedRo meetings.** ROHEALTH Cluster coordinates the Romanian Network of Clusters in the medical field-MedRo (<https://rohealth.ro/medro>). During the periodical meetings of the of MedRo Network the NE4HEALTH project was presented and as a result 2 of the members signed a Letter of interest to engage in the project network (South-West Oltenia Regional Development Agency and Transylvania Regional Balneoturistic Cluster).

# New European Electronics For Global Health and Wellbeing

- Also, **Bilateral meetings with European Clusters**, which materialized by signing the Letters of interest for the project (Cluster Salut Mental Catalunya, AIP Medical Clustering, iED - Institute of Entrepreneurship Development). During the meetings the project was presented and also the opportunities it brings.

## c) Memorandum of Understanding (MOU)

We manage the target of 125 letters of intent among all the consortium partners. 88 from them coming from SMEs and the rest from other stakeholders, such as associations, RTOs, Universities...

The list of the entities that signed and have interest in the project is in the [Annex 1](#).

# New European Electronics For Global Health and Wellbeing

## d) Online Networking Events. Webinars, Brokerages, Matchmaking...

Event	When	What	Who
BeHealth Brokerage ( <a href="https://rohealth.ro/en/behealth">https://rohealth.ro/en/behealth</a> ) - Online International Event in Healthcare	27-29th October 2020	The NE4HEALTH project was presented at almost all panels in individual presentation or within general presentations about the electronic sector and the health and wellbeing sectors. The event reunited actors as: Scientific Community, Industry, Civil Society, Policy Makers, and a lot more other stakeholders, from over 31 countries, who act on medical devices, digital health and care markets.	With almost 300 participants and 10 thematic panels.
Workshop: The future of Wearables	28th October 2020	Most of the wearables are focussed on wellbeing sectors. NE4HEALTH Project was introduced to assistants.	40 Participants
Workshop: trends in advanced printing for packaging	2nd November 2020	Packaging is applicable to many sectors, Food, wellbeing and Health included. NE4HEALTH project was presented in the workshop	35 Participants
Intra-Clusters Matchmaking Event 2020	11-12 th November 2020	Two virtual inter-cluster matchmaking sessions - an opportunity to network within the European cluster organization community through prescheduled one-to-one virtual meetings.	112 Participants

# New European Electronics For Global Health and Wellbeing

		The Intra-European Cluster Matchmaking Event is open to cluster and business network organisations from countries eligible for participating in the COSME programme, with published profiles on the ECCP website.	
Health Workshop	19th November 2020	Functional Printing and BioPrinting applications in the Health Sector. It was in Spanish but the project NE4HEALTH was promoted. Next edition we are organicig in English.	55 Participants
Biotech and e-health webinar	23rd February 2021	The primary goal is set to establish cooperation with Israeli entities. This meeting allowed to get acquainted with the biotechnology and health sector in Poland and Israel. We wanted to broaden your horizons in the modern technology industry as well as to provide practical knowledge in the field of products commercialization. Project was presented there.	71 Participants

# New European Electronics For Global Health and Wellbeing

OCTOBER 11-12 2020 // BUCHAREST, ROMANIA

## BEHEALTH 2020

POST-EVENT REPORT

**31 Countries**

10 THEMATIC PANELS

- E-health and Education
- Medical Equipment and Instruments
- Translational Medicine
- Materials for Health
- Health Research Infrastructures
- Security for Healthy Ageing (The Hospital from Home)
- Clusters for Health
- Social Responsibility for Health
- Quality for Medical Services
- HEALTH - Innovation for Health

**293 Registered Participants**

201 PRE-ARRANGED B2B MEETINGS

- Scientific Community: 132
- Industry: 101
- Civil Society: 28
- Policy Maker: 8
- Other: 6

ONE START-UP CONTEST, 3 PRIZES

- First Prize: Financing the Attendance of FRONTERS BERLIN
- Second Prize: One-year ROHEALTH Membership & Two Business Mentoring Sessions
- Third Prize: One Business Mentoring Session

ORGANIZERS: ROHEALTH, COST, BIOVOICES, Pronto, Hope

CO-ORGANIZERS: ANA, ASIAN, MEDITECH, ADRS, ReNITT, CCM

MAIN Objective: partnership of world leading clusters to configure a "European Strategic Cluster Partnership – Going International"

- Spain: Functional Print Clust.
- Germany: Organic Electronics Saxony
- Romania: RoHealth - The Health Cluster
- Latvia: Latvian Electronics and Electrical engineering cluster

## e) Tradeshows

We identify some fairs and tradeshows to go and promote the NE4HEALTH project. But due to Covid-19 situation and travel restrictions, most of the fairs have been postponed.

# New European Electronics For Global Health and Wellbeing

## II. Future networking activities

Below, the list of events mentioned. We plan to repeat them in the near future. On this report the events are only briefly explained as they will be detailed in the next networking Report, a deliverable planned within 6 months.

### a) NE4HEALTH members events:

Consortium partners support, promote and participate in the events of its members, therefore in 2021 there will also be opportunities to present the NE4HEALTH project and its activities during members events.

Below, examples of future events and the information compiled:

Event	When	What	Who
Matchmaking Friday	5th March 2021	Promote NE4Health	RTOs + SMEs / Europe
Web seminar SmartEES	8th March 2021	Promote competences, services or production capacities in flexible and portable electronics	RTOs + SMEs / Europe
Matchmaking Friday	22nd March 2021	Promote NE4Health	RTOs + SMEs / Europe
General Assembly of RoHealth Cluster	25th March 2021	During the event the NE4HEALTH project will be presented.	70 participants (cluster members)

# New European Electronics For Global Health and Wellbeing

Annual Letera Conference	26th March 2021	Matchmaking, information about project, project members, core competences, business interests in a project etc.	80 participants (at least 60 SMS)
BeHealth 2021	Oct 2021	The annual brokerage in health field, is planning to initiate through its panel's cooperation between stakeholders and SMEs in the field of health, wellbeing, medical devices electronic technologies in health field, etc. It will be an opportunity to disseminate the activities and the results of the project at the moment.	RTOs + SMEs / Europe

## b) Get in touch with different stakeholders regarding TTCs:

Example of Working sheet for getting in touch with stakeholders in TTCs:

Country	Who	Contact Person	Topic	Date
Japan	Optonet		ask about networking options networking events	
	BioM		ask about networking options networking events	
	WFS		present NE4 Health	
?	highTechstartbahn		present NE4 Health	
	Embassy of the Federal Republic of Germany Tokyo		present NE4 Health ask for contact person	
	Takahashi		present NE4 Health ask for contact person	

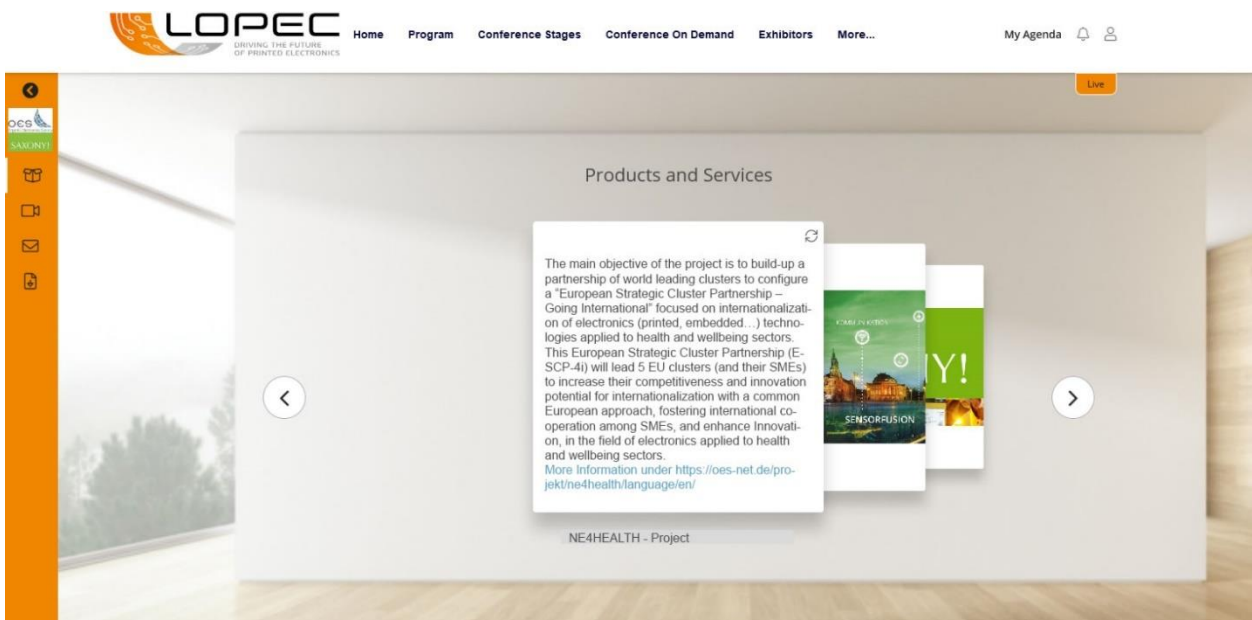

# New European Electronics For Global Health and Wellbeing

	Kentaro		ask about networking options networking events	
	Benjamin Rabe		present NE4 Health ask for contact person	
Israel	IAPP		ask about networking options networking events	
	Oreltech		ask about networking options networking events	

## c) Tradeshows

Event	When	What	Who
LOPEC – short for Large-area, Organic and Printed Electronics Convention – leading international platform in the field of printed electronics	March 23-25	Promote NE4Health	OES and its members Functional Print and its members

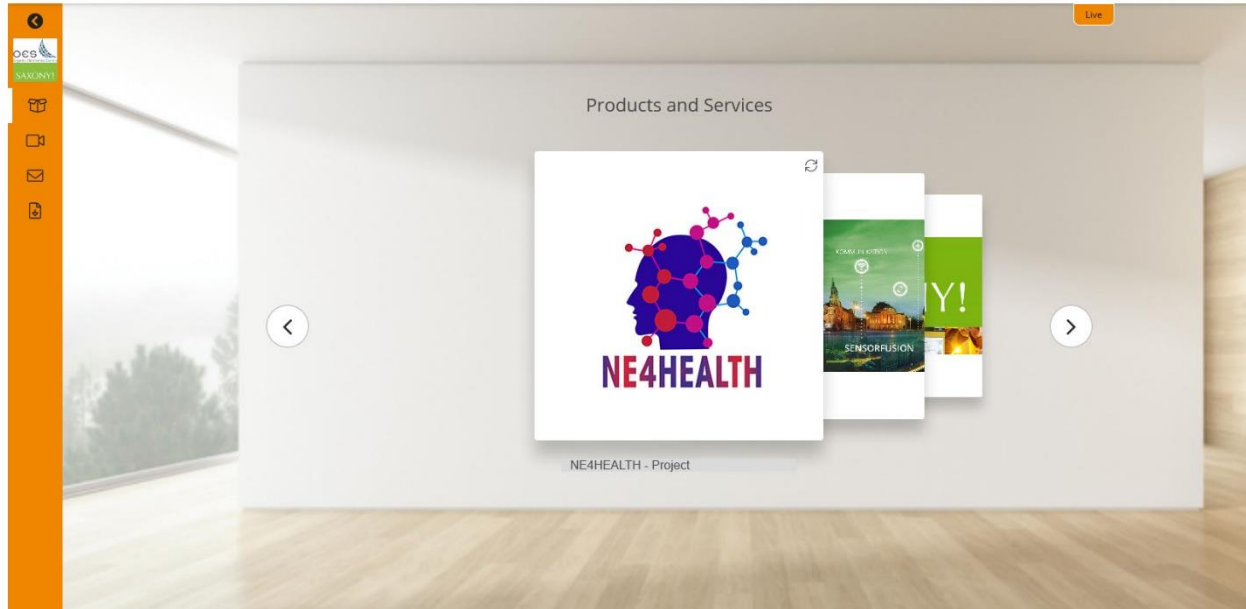

# New European Electronics For Global Health and Wellbeing

22 | Page

## CONCLUSION AND RECOMMENDATIONS

Networking is an important link in the project chain that leads us to achieve success.

It is a tool that will allow us to reorient, redirect and improve the initial strategy established, depending on how we establish contacts to the rest of stakeholders.

Times change and the way of working and interacting too. Adapting to those changes is a key to success. This adaptation will open different doors, lines of work and will give access to a range of international possibilities that, from the outside, we would not have thought at first. The COVID19 outbreak has forced us to make these changes faster, it has forced all entities and companies that want to internationalize to be flexible. The NE4HEALTH consortium and his partners, will continue working in this way to achieve all the expectations and objectives of this project.

In the end, the more stakeholders we have, the greater infrastructure, benefits and opportunities could be achieved with the project. There is strength in numbers and in collaboration.

**MISSION**  
*Increasing the economic competitiveness of the health field in Romania*

**VISION**  
ROHEALTH - Health Cluster aims to develop activities related to health, to promote and encourage cooperation between companies, organizations, universities and public entities.

7

**LETERA** Latvian Electrical Engineering and Electronics Industry Association

- Founded in 1995
- Members : 86
- LETERA unites companies, research and educational institutions operating in the fields of electrical engineering and electronics, optical equipment, information technology and telecommunications, defense equipment, aviation and space technology.

<http://www.letera.lv>

8

**Technology areas:**

- Design and manufacturing of semiconductor chips, sensor elements and networks, optical fiber production, 3D displays, artificial intelligence, image analysis and recognition, robotics and multi-robot collaboration systems, flying drones, radio communications and measuring equipment, radiation measuring systems etc.

- + Intra value chain of product
- + International Cooperation

Since 2018 FUNCTIONAL PRINT has developed more than 40 national and international projects.

The cluster gathers 98 members (36 SME's, 15 large industries, 20 Research Centers, 7 Universities)

**STRATEGIC SECTORS:**

- MANUFACTURING
- HEALTH
- INDUSTRY
- CONSUMER ELECTRONICS
- ENERGY
- SMART CITIES
- SMART WORK
- SMART HOME

13

**WORKING AREAS**

AN INCLUSIVE MODEL IN EUROPEAN FRAMEWORK

**ELECTRONICS**

From production of health devices (sensors, wearables, smart watches, smart glasses, etc.) to the printing of 3D printed solutions, medical devices, smart watches, smart glasses, smart home, smart work, smart city, etc.

**MANUFACTURING**

New production models for digitalized production and intelligent factories to meet the needs of the market and improve the competitiveness of the cluster.

**INDUSTRY**

Developing new products and services for the industry and the market, focusing on the development of smart products and services.

**SMART CITIES**

Developing smart products and services for smart cities, smart work, smart home, smart city, etc.

14

**ALLIANCES:**

**3NEO** (European Strategic Cluster Partnership)

**FUNCTIONAL PRINT CLUSTER**

**HEADQUARTERS:**

Madrid, Spain (European Strategic Cluster Partnership)

**CERTIFIED BY:**

European Strategic Cluster Partnership

**WITH THE SUPPORT OF:**

European Union, Spanish Government, Regional Governments, etc.

15

**NE4HEALTH - PROJECT OVERVIEW**

The project will help the medical technologies market in maintaining and improving its position worldwide.

**NE4HEALTH** is based on the classic concept of cross-KET approach (mixing both Digital and Production Technologies) to solve the societal challenge of "Health and Wellbeing", that at the end is fully aligned with one of the so-called Emerging Industries: Medical devices.

16

**NE4HEALTH - PROJECT OVERVIEW**

To build-up a partnership of world leading clusters to configure a "European Strategic Cluster Partnership – Going International" focused on electronics (printed, embedded...) technologies applied to health and wellbeing sectors, and make EU SMEs on these fields better connected internationally.

**MAIN OBJECTIVE**

Share and Cooperate among clusters

**BENEFITS**

17

**NE4HEALTH – SPECIFIC OBJECTIVES**

**Cluster & SME Collaboration**

- To foster clusters & SMEs mutual knowledge, high-level cross-regional cooperation and partnership building
- To help SMEs identify business and internationalization opportunities

**Internationalization Strategy**

- To identify global trends, selecting target countries more open to the development of an early market and, therefore, internationalization
- To analyse in depth these target markets
- To define an internationalization roadmap

**Value Chain approach**

- To consolidate a true trans-regional Value Chain
- To position SMEs into trans-European consortiums

18

# New European Electronics For Global Health and Wellbeing

### NE4HEALTH – Target group/audience

The target groups of the project are twofold:

**CLUSTERS**

Of the consortium, additional clusters and non-targeted Third Countries that bring or implement the project value chain. 2 different sectors are involved:

- the electronics sector, including printed electronics, embedded systems, 3D printing, flexible electronics, system-on-chip for IoT, Smart Objects, cyber-physical systems...
- the health and wellbeing sectors, including the sub-sectors of Medical devices that prevent, diagnose, monitor, treat and care for human beings by physical means, in vitro diagnostics as non-invasive tests used on biological samples to determine the status of one's health, and Digital Health and Care as ICT technologies to improve prevention, diagnosis, treatment, monitoring and management of health and disease.

**SMEs**

From these clusters, fitting in the project value chain, willing to collaborate with other SMEs (in the same sector or in a complementary one), and to go international in the defined target markets.

Two types of SMEs there:

- those of the electronics clusters, for instance, telecommunications, equipment, electronic components, industrial electronics, and consumer electronics.
- those of the health and wellbeing sectors, for instance, wearable biosensors for healthcare monitoring, E-skin devices for healthcare applications, implantable electronics...

19

### NE4HEALTH – Target group/audience

**STAKEHOLDERS**

- Large companies and RTOs (Research and Technology Organisations) that will also be surveyed to understand what are their priorities in terms of international markets and that also may want to benefit from the outcome of the project, including the future international missions.
- Public authorities, starting with:
  - national policy makers and internationalization agencies
  - national policy makers
  - the European commission

20

### NE4HEALTH – Opportunities

**MARKETS**

The main market that NE4HEALTH wants to approach is the medical technologies sector: products, services or solutions used to save and improve people's lives. In its many forms, they are with you all the time, from prevention, to diagnosis to cure. There are three main categories of medical technologies that will be approached within NE4HEALTH:

- Medical devices
- In vitro diagnostics
- Digital health and care

21

### NE4HEALTH – Opportunities

The importance of the medical technology market at European level is very significant as it can be shown in the figures:

- 10% of the European population is aged 65 and over.
- +€75.000 in sales per employee in the medical technology sector.
- €7000 average turnover per employee in the medical technology sector.
- 25% of the European population is aged 65 and over.
- €215 expenditure on medical technology per person in Europe.
- 10% of the European population is aged 65 and over.
- €115 expenditure on medical technology per person in Europe.

This high level of employment shows that the medical technology industry is an important player in the European economy.

Small and medium-sized companies (SMEs) make up around 95% of the medical technology industry, the majority of which employ less than 20 people (small and micro-sized companies).

In Europe, 10% of gross domestic product is spent on healthcare. The spending on medical technology is estimated to vary significantly across European countries.

Europe's medical technology market is the second largest medical technology market after the US (14.47%).
