

BIOMAN^{4R2}

Success Story

FINANCIAL SUPPORT PROGRAM

*"The financial support from **BioMan4R2** has been instrumental in establishing a framework to collaborate with a partner (URD ABI) for the short-term advancement and demonstration of InSpek's product. This funding enabled us to quickly launch a joint project and achieve results together, reaching key milestones in our product's development."*

BIOMAN^{4R2}

RESILIENCE FOR REGIONAL BIOMANUFACTURING AND MEDICAL TECHNOLOGY ECOSYSTEM

“This financial support program has significantly enhanced the resilience of the biomanufacturing ecosystem by fostering a robust local supply chain and developing expertise in bioprocess monitoring and optimization. Through these initiatives, companies have been able to streamline their processes, improving industrial competitiveness and reducing reliance on external sources. Moreover, the program’s focus on implementing sustainable solutions has prepared the ecosystem to better address ecological challenges, thereby strengthening its long-term adaptability and sustainability.”

IMPACT

“The financial support from the BioMan4R2 project facilitated InSpek’s development by enabling the testing and enhancement of our sensors in a pilot study with URD ABI. Implementing the sensors in a real bioproduction environment led to several system improvements. Overall, this project boosted our product’s technological readiness level, enhancing our capability to tackle complex industrial challenges and bringing us closer to commercialization.”
