Success Story

FINANCIAL SUPPORT PROGRAM

JAFRAL
passion for biosolutions

*"We are immensely grateful for the transformative impact of the Financial Support Programme. The funding allowed us to **modernize our software solutions** and integrate cutting-edge technologies, dramatically boosting our operational efficiency. Additionally, the program played a crucial role in upskilling our staff, equipping them with industry-leading expertise and ensuring that we meet the highest standards in the field."*

BIOMAN^{4R2}

RESILIENCE FOR REGIONAL BIOMANUFACTURING AND MEDICAL TECHNOLOGY ECOSYSTEM

*“The Slovenian biomanufacturing and medical technology ecosystem has seen significant growth over the past 10-20 years. Two decades ago, Novartis was one of the few companies engaged in biomanufacturing, with limited supporting industries. During the past years, we have seen a rise in new companies entering and expanding within this field, fostering a more resilient and diversified ecosystem. Additionally, major players like **Novartis and Sandoz** are planning to invest around **€500 million** to further enhance their capabilities, reinforcing the long-term stability and innovation potential of the region.”*

IMPACT

“Financial support has enabled our company to upgrade our production solution, Janet, by investing in new technologies and enhancing workforce skills. As a result, we have improved our competitive position, accelerated growth, and ensured higher product quality.”
