## **New Project Silicon Europe Worldwide | 01.01.2016 - 31.12.2017**

At the beginning of 2016, six of the 12 Silicon Europe partners started the project Silicon Europe Worldwide. The project aims at **exploring business opportunities for the European semiconductor industry beyond European borders**. Taiwan and the U.S. have already been selected as target countries in this regard; the first event took place in the framework of the European Innovation Week in Taiwan. For more information on the project partners, activities and news, please have a look on the new project website. » [more](#)

## **European Innovation Week | 30.05.-03.06.2016**

The European Innovation Week in Taiwan took place from May 30 until June 3. Nearly 100 people representing European organisations participated in the event. Additionally, more than 400 people representing the Taiwanese registered, clearly indicating the interest to collaborate with Europe. During this week, approximately 10 seminars were held along with a business matchmaking session during which over 250 participants brought together European and Taiwanese organisations. » [more](#)

## Success Stories

Next to the European Innovation Week, the project team achieved further success. Contacts to 16 different Taiwanese business support organisations were established. These include i.e. TAITRA (Taiwan External Trade Development Council) and SEMI Taiwan (Association of the Semiconductor Industry). In total, 37 European SMEs attended the organised events including the European Innovation Week. Ten of these have already established collaborations with Taiwan thanks to efforts made within the project.

## Matchmaking Event with Taiwanese Organisations | October 2016

A reciprocal event is scheduled on the occasion of **SEMICON Europa** (24.10. – 27.10.2016), taking place in Grenoble, France. More than 10 Taiwanese companies have registered for the event, which will focus on Smart Manufacturing. The registration for the event will be open in the course of September and is free of charge. The Taiwanese delegation will be available at the booth #866.

## Matchmaking Event with American Organisations | 2017

Next steps include the endorsement of established contacts with the U.S. In that respect, a fact-finding mission in Albany, Syracuse and Rochester will take place in November this year in order to intensify these contacts. The ultimate project goal is to organise a matchmaking event with semiconductor related companies and research centers in one of these locations in 2017.

## How can you benefit from these actions?

- » Organisation of matchmaking events with American or Taiwanese counterparts
- » Information material on target countries
- » Global promotion of Europe's semiconductor industry

For more information about the project and the potential opportunities for you to participate, please contact your cluster management or [info@silicon-europe.eu](mailto:info@silicon-europe.eu).

## Other Upcoming Events | 2016

### 07.-09.09.2016 SEMICON Taiwan

Meet us during the 2016 [International Semiconductor Advanced Manufacturing Equipment Technology Forum!](#) 8th of September 2016, 1F Main Stage, Taipei Nangang Exhibition Center, Hall 1

**SEMICON®**  
*Taiwan2016*

### 24.-27.10.2016 SEMICON Europa

Meet us at the [Allée des Clusters!](#)

**SEMICON®**  
*Europa2016*
