

CLAMTEX partners held a series of virtual workshops for internal benchmarking

The European Cluster Strategic Partnerships for Excellence, CLAMTEX - *Cluster management towards excellence in Advanced Manufacturing and Textile Industry*, has organized a series of remote workshops among the different cluster management teams.

Those workshops used participatory methodologies within a virtual platform for collaboration using design thinking. The series of workshops aimed at mutual learning and identify the partnership baseline in terms of strategy.

The different workshops will enable the generation of a baseline report that will serve as a starting point for further project actions such as strategy review, cluster labelling and cluster capacity building program definition.

Clusters participating in the ideation session during one of the remote workshops.

CLAMTEX is one out of 13 funded consortiums at European level. The CLAMTEX partnership is composed by five clusters, [AEI TÈXTILS](#) in Catalonia, [ATEVAL](#) in Valencia, [PRODUCTECH](#) and the [Textile Cluster](#) both in Portugal, and [EMC2](#) in France.

The project, co-funded under the COSME program from the European Union, aims to strengthen cluster management excellence to boost the specialized technical textile innovation eco-system by promoting the cross-sectoral and cross-regional collaboration to facilitate the uptake of digitalization within and beyond the partnership.

CLAMTEX will also implement the ClusterXchange pilot scheme to facilitate SME international experiences across Europe for generating business and innovation opportunities.
