

## ReinaPLUS - TMGM of Chile

*The first Target Market Group Meeting of Chile was organized in the European Utility Week in Barcelona on the 16<sup>th</sup> of November, on the stand of the Basque energy Cluster. The meeting was attended by more than 15 companies in the field of renewable energies and electrical grids.*

José Ignacio Hormaeche, Director of the Basque Energy Cluster, presented during the session two energy market reports, from Chile and Mexico. Both reports produced within the European REINA PLUS project.

These market reports focus on the possibilities offered by both the Mexican and Chilean markets in the field of electric grids and renewable energy sector. Both documents include a review of each country's regulatory framework, its energy situation and an energy sector analysis, with particular emphasis on electric grids.

These presentations were attended by **more than 15 companies and research entities**. Following them, the **Target Market Group Meeting (TMGM) of Chile** was held, in which the participants exchanged experiences and visions about the Chilean market.

### About REINA PLUS

A consortium of European clusters led by the Basque Energy Cluster is developing the REINA PLUS project in 2016 and 2017, funded by the European Commission DG GROW within the "Clusters Go International" call of the COSME European Program. Together with the Basque Energy Cluster, the following clusters are participating in REINA PLUS:

Merinova from Finland, OÖ, Energiesparverband from Austria and EnergyIn from Portugal.

The objective of the project is to promote, support and strengthen the internationalization of European companies in the field of renewable energy and electric networks in a number of international markets identified as high potential markets in the sectors mentioned above: Mexico, Brazil, Chile, USA and North Africa. Cooperation between European energy clusters also aims to encourage cooperation between companies to confront international markets and to integrate European companies into value chains that compete globally in the field of renewable energy.

Reina PLUS ESCP-4i will keep you regularly informed of any actions launched!
