0,006% Tecnopolo S.p.A.

Share Capital: 85.955.518,88

Mission of Tecnopolo

The Rome Technology Park system was conceived to achieve the following objectives:

- create and manage create organized systems for attracting and hosting innovative companies and projects
- attracting and hosting R&D initiatives for developing and testing innovative solutions and products useful for business
- promote initiatives for developing R&D activities and networking research-business
- create an innovative pole and cluster of companies for implementing and developing new business initiatives

The Park system is structured according to two projects with different missions and different locations:

- the **Tiburtino Technology Park**, east of Rome, mainly hosting Aerospace, Electronics and ICT companies;
- the **Castel Romano Technology Park**, south of Rome, oriented toward research and technology transfer regarding life science, new materials and environment.

Tecnopolo Tiburtino

Tecnopolo Tiburtino covers a surface space of 72 hectares at east of Rome (4 kilometers from the national highway network, easily to be reached from the international airports of Fiumicino and Ciampino), in an area already hosting important Italian electronic and aerospace industries.

Tecnopolo Tiburtino activity is aimed at supporting local SMEs, also proposing real estate solutions within well equipped areas.

The Tiburtino Technological Park also offers to localized companies supporting services such as broad band network, meeting rooms, canteen and bar service, bike path, private parking, etc..

Companies and SMEs who choose to localize within the Tecnopolo Tiburtino could operate in a context well known and recognized at local, national and international level, also to:

- work in a prestigious environmental and architectural context, well equipped with innovative networks and plants
- work in large and visible space offices, localized in a well recognized context
- meet, interact and collaborate with other companies and SMEs for developing innovative projects and initiatives
- participate at information and training supporting initiatives organised for companies

Tecnopolo Tiburtino figures

- More than 100 companies
- 4 R&D laboratories and workshops
- More than 30 innovative start up
- More than 2.500 employees

Sectors and activities

Companies located at the Tiburtino Park mainly work in the following sectors:

Aerospace

Business services

Communication, Graphics, Publishing, TV and Digital Creative Industries

Engineering, Architecture, Design and Technical Services

Green Economy

ICT, Electronics, Telecommunications

Life Sciences

Mechanical and systems engineering

Research, Technology Transfer and Valorisation

Tecnopolo Tiburtino main services for SMEs

- Office area and spaces for innovative companies and start up
- Networking/information/training initiatives
- Local institutional relationship support
- Workshops for companies regarding call for proposal, financial instruments, etc.

Tecnopolo Tiburtino strong points

- More than 100 companies located in the area and mainly operating in ICT, Aerospace and Innovation and Technological Transfers (most of companies are very experienced as to their activity sector and considered as a real point of reference at local, national and also international level)
- More than 30 innovative start up

- 4 R&D laboratories and workshops
- Tecnopolo as a real and effective cluster gathering enterprises and laboratories, well recognized at local, national and international level.

Tecnopolo of Castel Romano

Tecnopolo of Castel Romano (about 130 acres, 52 hectares, south of Rome), is a great research area connected to the most qualified national and international partners focused on Special Materials, Biotechnologies and Environment.

At present, Castel Romano hosts the Centro Sviluppo Materiali (Materials Development Centre, www.c-s-m.it) the laboratories of ISPRA, the Italian Institute for Environmental Protection and Research (www.isprambiente.gov.it), the Consorzio of Castel Romano mainly focused on research on biotechnologies and connected training (www.dipartimentobioscienze.it) and companies/start up focused on biotechnologies and life sciences.

The Castel Romano Technology Park is one of the drivers of applied research in Italy, for encouraging dialogue between scientific culture and business culture. The value of the whole Castel Romano property is aimed at supporting the establishment and development of new materials, biotech and renewable energy companies, start up and spin off, also offering advanced research services within a high quality environment.
